## % as Transfer Receipts

Personal current transfer receipts (PCTRs) are defined as income payments to persons for which no current services are performed plus net insurance settlement. PCTRs represent the sum of government social benefits which consist of social security payments, Government pensions, Military retirement, and both SNAP and TANF assistance; plus, net current transfer receipts from business. However, PCTRs are not a measure of welfare assistance, but rather are indicative of the population of retired individuals throughout the measured area.
